**DETAILED ACTION**

1. Amendment filed on 8/23/04 has been received.

***Claim Rejections - 35 USC § 103***

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 1-17 are rejected under 35 U.S.C. 103(a) as being unpatentable over Kosik et al (U. S. Patent no. 5,700,227) in view of Slicker et al (U. S. Patent no. 5,314,050).

Kosik discloses: See entire document. The brake actuation is detected by either pressure, stroke or force (see column 2 lines 13-30 and column 4 line 21-29). Vehicle speed is detected downstream of the clutch by sensor 11. Clutch is completely disengaged above brake pressure  $P_s$  (see figure 1 or Column 3 lines 10-14). The controller controls the torque transmitted by the clutch such that the torque declines as brake pressure increases (see figure 1).

Kosik et al does not disclose using the speed as a the creep parameter. Slicker et al teaches use of the speed as a the creep parameter (see column 6 lines 14-27) to control the transmission input shaft speed as measured by sensor 31. It would have

been obvious to one of ordinary skill in the art at the time the invention was made to use speed as the creep parameter instead of torque as speed is easier to measure than torque and the two variables are directly related.

4. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
